

100B Cup Sleeve 100B

Brought to you by **100 Billion Stars**
Appreciating the Endless Possibilities of the Creative

Spice up your routine with a fancy cup sleeve. Show off a little with one, or two or three, made in your favorite designer's fabrics. These cup sleeves are adjustable and will fit a grande or venti with no problems at all. And besides looking fabulous, they absorb condensation from your iced drink.

Materials:

Coordinating Fabrics – two pieces measuring 5½” x 11” each
Fleece (or Insul-Bright and batting) 5 ½” x 11”
Six 15/32” grommets
Ribbon (approximately one yard)

Notes:

Cutting Note:

When cutting fabric be sure to reverse the second piece as pattern is not symmetrical. If stacking fabric to cut, one fabric should be right side up and the other wrong side up.

To use Insul-Bright, place Insul-Bright layer against the interior side of the sleeve. This will keep both the heat and the cold where it belongs.

Printing Note:

Select “None” for page scaling in the print dialog box before printing to ensure pattern prints in full size.

Coffee Sleeve - Instructions

Layer pieces in the following order: interior fabric (right side up), exterior fabric (wrong side up), craft fleece or Insul-bright and batting. Pin all layers.

Sew a quarter inch seam around pieces leaving a gap of approximately three inches for turning.

Trim seams. Clip curves and corners. Turn inside out and press.

Topstitch around all edges. Edgestitch a quarter inch from topstitching.

Following manufacturer's instructions, attach grommets at marks. Lace ribbon through grommets and tie.

Enjoy!

Note: To finish sleeve without grommets, use a large eyed tapestry needle and thread with narrow grosgrain ribbon. Lace ends of sleeve together. This method should be considered permanent. After lacing and tying bow, use matching thread to secure. To ensure a proper fit, wait until you have tried the sleeve on the size cup you intend to use.
